
INTERDISCIPLINARY STEM SEMINAR SERIES

(Science Technology Engineering Mathematics)

Women in MEDICINE

Thursday, November 2nd, Reuter Center, Room 102A
4:30 PM to 6:00 PM

Speakers:

Dr. Amanda Rollins Maxwell

Adjunct Professor, Chemistry Dept. and Health Wellness Dept.

Dr. Laura Jones

Assistant Professor, Health Wellness Department

This presentation will highlight the pioneers and historical contributions of women in medicine as well as profiles of contemporary women healthcare leaders. In addition to successes, the presenters will discuss barriers that women face in the healthcare field, including traditional and present-day values and biases inherent to medical research, the medical field, models for providing care, and medical training programs. Lastly, the presenters will explore the growing number of women in the medical field and ways that women can further be supported in entering and excelling in their medical careers.
