

# A Compilation of Resources Showcased at the 2022 Arizona Community Tree Council Conference and Workshops

---

## Arizona Urban Tree Map Field Guides

Tree Identification Guides for your Urban Forests of Arizona. Click your region below to view the free, downloadable PDF resource guide:

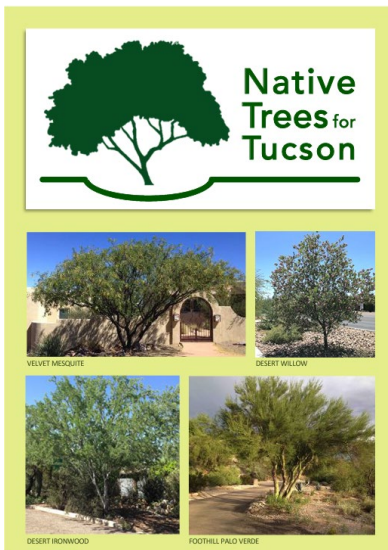

[Southwest Desert Climate Region](#)

[North Climate Region](#)

[Interior West Climate Region](#)

## *Ten Best Practices for Using Native Trees in Urban Environments to Improve Urban Climate Change Resilience*

A [60-page guidebook](#) with photos and information about 14 native desert trees suitable for the urban environment. There is also a [14-page handout version](#) that summarizes the information in an easy to print format.

## *The LEAF Network's publication, Growing Edible Arizona Forests, An Illustrated Guide*

This guide helps you LEARN, CHOOSE, PLANT, CARE for, and HARVEST edible trees. You can **download the PDF of the entire Guide** or go to sections of the Guide at their [website](#). This website offers explanations, photos, illustrations, and resources to help you get started enjoying edible trees. At the top of each Guide section is a link that allows you to print that section.

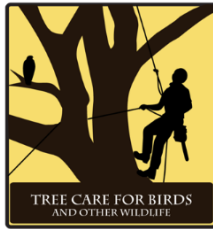

## Shade Tree Planting Prioritization Tool

Find Shade Tree Planting Prioritization reports, printable maps, and advanced web maps that can help inform tree planting plans, decisions, and community action. [Visit the DFFM webpage to view these materials.](#)

**Tree Care for Wildlife  
Best Management Practices**

with Western Chapter ISA Appendices

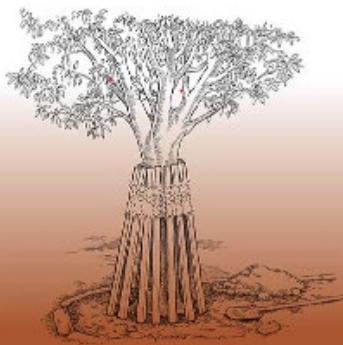

Corey Bassett, Kara Donohue, and Ryan Gilpin

*Tree Care for Wildlife - Best Management Practices with Western Chapter ISA Appendices*

This BMP provides guidance to the tree care and landscape industry about how to minimize impacts to wildlife and manage wildlife habitat during tree work. It is available to [view and download online](#), or can be purchased in booklet form (visit [this webpage](#) for more information).

Be sure to check out Appendix C - page 48 - for Arizona specific information!

**Managing Trees  
During  
Construction**  
Second Edition

Companion publication to the ANSI A300 Part 3: Tree, Shrub, and Other Woody Plant Maintenance—Standard Practices (Management of Trees and Shrubs During Site Planning, Site Development, and Construction)

*Best Management Practices - Managing Trees During Construction, Second Edition - International Society of Arboriculture (ISA)*

This BMP describes tree conservation and preservation practices that help to protect selected trees throughout the construction planning and development process so that they will continue to provide benefits for decades after site disturbance.

[Available for purchase at the ISA Store](#)

*Coming Soon - Expect Updates in December:*

**Urban Tree Threat Response Guide I** - An Arizona and New Mexico resource. Created with input from field experts, the Urban Tree Threat Response Guide will include an interactive website designed to assist in the identification and mitigation of insect and disease threats to urban trees by vegetation zone.
