

Pat Schultz is a CFO and business partner that strives to maximize shareholder return through profit enhancing strategies focused on growth, technology enhancement and an efficient and effective cost structure. After spending nearly two decades in multiple industries at both large and small entities, Pat knows what it takes to create long-term sustained profitable growth - and it's not through cost cutting. It's through continuous improvement, building collaborative and effective teams, and cultivating internal and external relationships.

Pat started his career as an auditor at KPMG LLP before moving to various finance roles at Genworth Financial (former GE), SAE Towers, and Air Liquide. His current role is Chief Financial Officer of Air Liquide Advanced Materials, headquartered in Branchburg, NJ.

Pat holds a BS in finance and accounting from Trinity University, an MPA from the University of Texas at Austin, and an MBA from Duke University.
