

Providing software for the portable diagnostics industry since 1989

That is back when electronic claim submission was done with a 1200 baud modem

And remittance information came on a 9 track tape

Stored about 113 megabytes

Why Compu-trol Technologies?

Our Portable Diagnostics Management System (PDMsys) is designed from inception with just one industry in mind.

Portable Diagnostics

Industry driven functions like bi-directional EMR integration, modality work lists and flexible facility billing are requirements of any system in the industry today.

Features like
Holter tracking
QR coding
&
Conflict checking

Can only come from listening to our clients and the unique challenges their operation faces.

Over the next several weeks we will reach out to you, to learn about your operational challenges how we can help you smooth them out.
