

NAU IN BELIZE

Tropical Cave Ecology Field School

WINTER BREAK JANUARY 2 - 9, 2027

Immerse yourself in one of Central America's most biodiverse regions while conducting authentic scientific research in Belize's tropical cave ecosystems. Participate in biodiversity surveys, cave microclimate monitoring, bat acoustic studies, habitat mapping, and wildlife monitoring alongside faculty and research teams in the field. Gain hands-on research experience while exploring remote tropical landscapes, collecting ecological data, and contributing to an ongoing conservation research program.

**EARN 2.00 CREDITS OF:
BIO 485 OR ENV 485**
