

Align. Design. Lead.

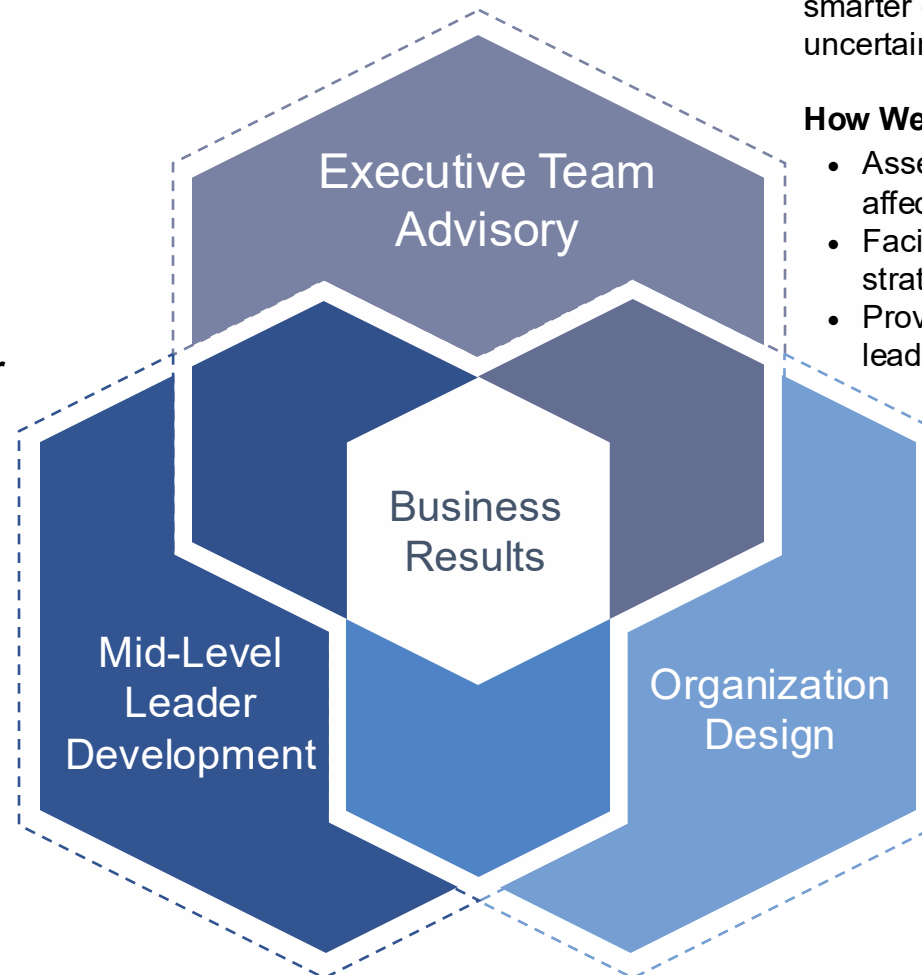

Transforming Organizational Performance

with a **partner** that understands your business and how to get results.

Lead. Growth – whether now or in the future – is much more achievable when mid-level leaders effectively drive execution on their own. **When this capability is lacking, senior leaders must step in, diverting their attention from essential strategic priorities.** By empowering mid-level leaders, organizations can better navigate uncertainty and achieve sustainable performance and growth.

Our Partnership Approach:

- Assess leadership gaps and identify development requirements.
- Offer tailored leadership development that emphasizes strategic execution and team management.
- Provide coaching to strengthen essential skills.

Align. A misaligned leadership team slows decision-making, creates operational bottlenecks, and threatens stakeholder trust. We partner with leadership teams to align around strategy, strengthen collaboration, and make faster, smarter decisions—so your business can focus during uncertainty and scale or realign with confidence.

How We Partner:

- Assess the team to identify strengths and misalignment affecting strategic outcomes.
- Facilitate workshops to improve team effectiveness and strategic alignment.
- Provide executive coaching to enhance individual leadership and team results.

Design. Scaling or realigning your organization requires a structure that is **fluid, adaptable, and driven by purpose.** Misaligned roles, unclear reporting lines, and siloed structures can cause delays and limit business potential.

How We Partner:

- Assess your organization to identify strengths, misalignment, and barriers.
- Design a more agile organization and a culture that supports business growth.
- Provide implementation support to ensure the design is embedded effectively.

How We're Different

Deep Experience With Companies at Inflection Points

- Many firms offer general consulting. We focus on helping our clients *navigate major inflection points—such as rapid growth and scaling, mergers, product launches, executive transitions, and strategy shifts.*
- We help you achieve strategic clarity, executive alignment, and seamless transitions during these pivotal moments.

Personalized, Scalable Solutions

- Small to mid-sized companies are often overlooked by larger consultancies. *We offer personalized attention while scaling solutions for either growth or realignment*
- We have the agility, responsiveness, and the ability to tailor solutions to the nuances of your business. We work with our clients in the way that works best for them – from pure advisory to co-creators to full implementers.

Focus on Organizational Resilience Amid Change

- With ongoing economic uncertainty, rapid technological advancements, and shifting workforce expectations, *organizations need to become more adaptable and resilient.* Our services in culture enhancement, leadership and team development, and change advisory directly address these challenges.
- We're your partner for building a resilient organization, by helping embed adaptability and agility into your culture, leadership, and operations.

Executive Team Performance as a Cornerstone

- Boards and senior leaders often see team misalignment as a top barrier to effective strategy execution. That's why we emphasize aligning and strengthening executive teams as the foundation for organizational success.
- We deliver a tailored approach to executive team alignment – *through coaching, facilitation, and assessments – helping you drive both immediate and long-term results.*

Seamless Integration of Strategy and Implementation

- Some consulting firms focus solely on strategy, leaving clients struggling with execution. *We bridge the gap—helping mid-level leaders translate strategy into action.*
- We empower mid-level leaders with the skills and tools needed to operationalize change, ensuring success at every level.
