**What does the Opioid Addiction Treatment TeleECHO program provide?**

The Opioid Addiction Treatment TeleECHO program provides training in opioid use disorders at no cost, delivered right to your clinic every week. Using simple videoconferencing technology, healthcare teams connect to a community of learners.

Seven different bi-weekly programs and schedules to choose from:

- One program targeted to CHWs
- Six programs targeted to all primary care team members

**Benefits of participating:**

- Free continuing education credit
- Opportunity to present actual patient cases, in a de-identified format, and receive specialty input
- Opioid addiction treatment training, including management of nalaxone/buprenorphine (e.g.) Suboxone) and injectable naltrexone (e.g. Vivitrol)
- Close community of learners who share best practices and resources
