

CT POSTDOCTORAL IN NEUROPSYCHOLOGY

Extend the scope of your ASSESSMENT PRACTICE and TREATMENT INTERVENTIONS

The faculty at Fielding are expert practitioners in the field and provide a curriculum that is rigorous, challenging, and extremely rewarding.

John Pellitteri, PsyD
Neuropsychology Certificate Graduate

Fielding's **Postdoctoral Certificate in Neuropsychology** program provides psychologists with formal instruction in neuropsychological foundations, theories, and assessments in preparation for practice as a neuropsychologist.

Our curriculum provides a broad foundation in the latest theory and research in brain-behavior relationships and training in how to conduct a comprehensive neuropsychological evaluation. Throughout the program, the careful study of patients with various neuropathological disorders develops clinical skills and knowledge related to understanding the interaction among psychosocial, neurological, and medical factors impacting the patient's functioning and development of treatment strategies.

Students and faculty meet one weekend a month, 10 months a year, in cluster groups located in New York City and Southern California. Most students complete the program in two years and spend an average of 5 to 10 hours a week on their studies in addition to their clinical activities.

PROGRAM BENEFITS

- **Expand** your practice and increase your income
- **Complete** many requirements towards board certification
- **Learn** neuropsychological foundations, theories, and assessments
- **Acquire** hands-on experience in neuropsychological evaluation
- **Study** with renowned faculty

CT POSTDOCTORAL IN NEUROPSYCHOLOGY

BENEFITS OF FIELDING GRADUATE UNIVERSITY

- WASC accredited
- Accomplished and collaborative faculty
- Integrate work and graduate study

TUITION & FEES

\$4,040/term

Further details may be found in the University Catalog. Tuition and fees are subject to annual revision.

HOW TO APPLY

Apply online at:
www.fielding.edu/apply

Application Requirements:

- ☒ PhD, PsyD, or EdD in Psychology
- ☒ Minimum GPA of 3.0
- ☒ Online Application Form
- ☒ Curriculum Vitae (CV)
- ☒ Psychologist License or Certificate
- ☒ Statement of Purpose
- ☒ Official Transcript

CURRICULUM SEQUENCE

Students complete one course per term.

THEORY/FOUNDATION OF CLINICAL NEUROPSYCHOLOGY COURSES:

NEPSY 825: Neuroanatomy and Brain-Behavior Relationships

NEPSY 826: Neuropsychological Disorders

NEPSY 827: Methods and Principles of Neuropsychological Assessment

CLINICAL ASSESSMENT COURSES:

NEPSY 830: Neuropsychological Assessment of Neurological Disorders

NEPSY 831: Neuropsychological Assessment of Psychiatric Disorders

NEPSY 832: Neuropsychological Assessment of Developmental Disorders

CLINICAL EXPERIENCE:

NEPSY 893: A minimum of 1,000 hours of clinical experience involving neuropsychological evaluation and report writing. Patients come from your own practice or employer. Evaluate at least 50 individuals over two years; no more than 20 hours may be accrued for one case. These cases will be presented in cluster. Your faculty advisor will inform you about special requirements for preparing a presentation (e.g., format, need to schedule a time or not, etc.)

CASE CONSULTATION:

NEPSY 892: 200 hours of Clinical Case Consultation provided by the Neuropsychology program faculty. Over the course of two years, students must maintain a 1/5 ratio of consultation hours to practicum. If not, a third year is required (see below.)

FINAL PROFESSIONAL EVALUATION (FPE):

NEPSY 836: Students submit a written, comprehensive case study and are orally examined on it. The FPE occurs in person unless this requirement is waived by the faculty member because hardships related to an in-person exam would delay the student's program completion. Any time the FPE is redone due to an initial failure, the event occurs in person.
