Second only to FleaBay, Amazon has the best selection of crap swords around! It is a Jungle in there!

ALWAYS TRUST

A SELLERS FEEDBACK. EBAY AND AMAZON ARE TOTALLY
FOOLPROOF.. (COUGH)

Stainless Steel Rocks

Don't believe the hype

Remember - the most important thing is your sword is razor sharp. If it is not described as razor sharp, do NOT buy it! Sharpness is the ONLY factor that counts in a sword - steel and tang is not important - and 440 surgical stainless steel MUST be good for a sword because it has the word 'surgical' in it.

Cheap is Best

There is no reason to spend more than \$50 to get a battle ready sword.

There are many amazing knock-offs and rip-offs of haughty brands who think they know what makes a good sword. Teach them a lesson, buy a knock off and then review it on the internet pretending it is the real thing. That will teach those arrogant sword makers to bring their lofty prices down to under \$50. How dare they..

Sharp with Speed Holes

Never buy a sword without speed holes..

Speed holes make a sword faster - and were totally historical. If you buy a sword WITHOUT speed holes you are just wasting your money.

And don't forget...

Always test a sword on yourself first

If you feel a sword is not very sharp, try to saw off your own arm with it. If it doesn't cut you to the bone, demand an immediate refund. If it does cut you to the bone, congratulations! Your sword will Keeeeel!

Finally

HAPPY APRIL FOOLS EVERYONE..!
