

Free Trees for West Hartford Residents!

The West Hartford Tree Project is again giving away 1000 young trees to any West Hartford Resident. All of our trees are native, and are therefore well adapted to the environment, will provide food and shelter to pollinators and other wildlife, and will provide decades of other benefits to landowners. Huge thanks to our 60+ donors, to Sustainable CT, to our many volunteers, WH Leisure Services, and to Eversource! Please use the following **links** to learn more or to request trees:
