

Study for Teens WITH ADHD

The Olin Neuropsychiatry Research Center of Hartford Hospital/Institute of Living seeks right-handed teenagers (ages 13-18) with ADHD to participate in an MRI-based study.

Qualified volunteers for the study will participate in an interview, reward-based tasks, some questionnaires, neuropsychiatric tests and a non-invasive brain imaging scan.

Volunteers will be compensated 20 dollars an hour for their time, plus bonus money for reward tasks. The study is expected to take 8-10 hours total.
