*Honoring the great women
who have made a positive impact
in our communities.*

"A woman knows life takes shape in big and small spaces and the moments in between.
When we're simply ourselves, in the everyday act of being,
we don't have to move mountains or make miracles... but sometimes we do anyway.

You can see it in the many paths we take and in how we come together
to create something greater than any one of us could alone.
Women change the world every day."
