

Home & Vehicle Modification

Apricus provides nationwide modification services for injured workers requiring assistance with alteration and equipment installation to their home and vehicle. Our program is committed to providing injured workers with the modifications needed to live as independently, safely, and productively as possible.

Benefits of Home/Vehicle Modification

Our home modification program is designed to provide injured workers with day-to-day assistance that increases mobility, prevents additional accidents, and promotes rehabilitation.

- Licensed, credentialed, and insured contractors
- Consistent communication between all parties
- Negotiated pricing based on multiple bids
- Multiple bids are obtained and provided to client

Custom Items

Experienced staff are available to provide assistance 24/7. Through our referral coordination program we will secure a home/vehicle modification provider for the injured worker in a timely, professional manner. Once the case is established, we'll manage everything from order through completion.

Specialized Services

Apricus also offers specialized services to further improve an injured worker's quality of life.

- Specialized wheelchairs
- Rehabilitation equipment
- Home maintenance
- Electric and motor scooters
- Aids to daily living accessories and devices

Extensive Provider Network

Apricus increases case efficiency and overall program savings by contracting with a broad range of cost-effective local and national home/vehicle modification providers that cover many specialties.

This ensures that our network providers meet the highest standards. We require our home/vehicle modification providers to be evaluated and credentialed by a nationally-recognized professional review board. Once a provider is in the Apricus network, they are routinely evaluated through our quality review program.

Specialty Network Solutions

Durable Medical Equipment | Diagnostics
Home Health | Home & Vehicle Modification
Facility Care Management | Prosthetics & Orthotics
Transportation & Translation
