	Toronto City Council's adoption of the TransformTO Net Zero Strategy in December	Duncan MacLellan duncan.maclellan@toronto.ca

2021 set the city on the path to reduce community-wide emissions to net zero by 2040, 10 years earlier than initially proposed. Toronto's net zero by 2040 target is one of the most ambitious in North America. Through the Better Buildings Partnership (BBP), the City delivers a variety of programs that provide funding, expertise and support to help building owners improve energy efficiency and accelerate emissions reductions in their residential, commercial, industrial and institutional buildings across Toronto.

Buildings are the largest source of greenhouse gas emissions in Toronto today, generated mainly from burning fossil fuels for heating, cooling and hot water. The City's target is to reduce emissions from all sectors to net zero by 2040.

assessment, zoning review and Committee of Adjustment, design, product and materials research, building permit, construction contract administration). Our experience of over 25 years (much as employment with other architects) includes project types (i.e. capitalized Ontario Building Code occupancy types):

RESIDENTIAL: (single family homes, multi unit residential buildings both new and retrofit, college residence, hotel partial renovations),

INDUSTRIAL: (vehicle maintenance garage, 11,000 ton salt storage 'shed', warehouse renovation)

INSTITUTIONAL: (seniors long term care, psychiatric hospital, police station with detention quarters)

ASSEMBLY: (library, museum, art gallery, churches, school partial retrofits, indigenous cultural centre)

COMMERCIAL: (bank branch prototype, small medical office, office building lobby)

Heritage: (theatres, conservation plan, heritage assessment report, fire restoration, verandahs)

When specific projects are discussed, appropriate credits are given.
Our passion is energy efficient design using Passive House principles.

	In the construction industry, the name Ontario Panelization (OP) is synonymous with quality, service, and innovation. Founded in the early 1980s, OP honed its expertise with structural, load-bearing steel stud assemblies. Over the past two decades, OP has set itself apart from the competition by expanding its product line significantly and building on a strong foundation of expertise. Working proactively with owners, architects, and general contractors, OP is a vital resource in streamlining the building process. This advantage translates into better coordination and communication which reduces overall project costs. OP offers extensive experience in pre-panelized and field-applied exterior wall systems. Finishes include Ceramitex® – sintered ceramic, aluminum plate, aluminum composite, solar facades, natural stone, porcelain, exotic metals, and specialty veneers. www.ontariopanelization.com	David Waugh david@ontariopanelization.com 519-659-8900

OpenSpace is the global leader in reality capture and AI-powered analytics for builders with projects of all shapes and sizes, whether a quick renovation or a multi-year megaproject. Timescapes is a visual intelligence platform for remote construction monitoring. It allows busy construction management professionals to monitor construction projects remotely — in real-time — and make better-informed decisions to lower costs, reduce schedule delays, mitigate risk, and engage stakeholders across the construction project.

Our platform uses visual AI to analyze high-resolution timelapse images captured by our cableless, easy-to-install jobsite cameras and delivers real-time data and analytics to everyone on the project team to enable efficient dispute resolution, collaboration, and communication across every construction project.

Established in New Zealand in 2017, Timescapes is quickly becoming a must-have
