BeforeBuild is a Design & Construction Intelligence team providing digital strategy, BIM, and VDC support across compliance, design, construction, and handover. The company helps owners, contractors, and project teams improve clarity, coordination, and control so issues are resolved in preconstruction instead of in the field. Core capabilities include BIM Execution Planning, ACC/CDE information management, MIDP and submission workflows, model QA/QC, 5D quantity workflow enablement, 4D sequencing support, asset data strategy, and digital handover readiness.

BeforeBuild combines structured governance with practical delivery support, using clear standards, accountable coordination, and data-driven checks to reduce rework, protect schedule and budget, and improve project outcomes. Its approach centers on validating constraints early, planning robust workflows, and supporting execution with coordination, sequencing, digitized processes, and practical AI.

Boost Learning Design (Boost LD) is a consulting and training firm that helps skilled trades companies and unions build stronger, more capable organizations. We specialize in HR strategy, leadership development, and workforce training tailored to blue-collar environments.

We partner with owners and business managers to reduce risk, improve performance, and strengthen both field and office teams. From HR diagnostics and policy development to apprenticeship design and leadership training, our solutions are practical, actionable, and built to scale.

What sets Boost apart is our deep understanding of the trades. We combine HR and learning expertise with real-world industry experience to deliver programs that stick. Our proven frameworks equip leaders to make better decisions, delegate effectively, and build accountable teams.

Our goal is simple: build leaders and systems that drive long-term success.

Building Up is a Toronto-based non-profit social enterprise that delivers construction and contracting services while creating career pathways in the skilled trades. Founded by Marc Soberano, the organization operates as a “social contractor,” reinvesting project revenue into workforce development programs for individuals facing barriers to employment.

Through services such as general contracting, water-efficiency retrofits, and labour support, Building Up partners with housing providers and businesses to improve infrastructure and environmental performance.

At its core is a paid pre-apprenticeship training program that combines classroom instruction with hands-on job site experience, equipping participants with technical, safety, and employability skills.

By integrating social impact with commercial operations, Building Up helps clients complete high-quality projects while enabling participants to transition into long-term careers in the trades.

Caisson Consultant Inc. is a premier foundation drilling and piling equipment supplier based in Aurora, Ontario. Established in 2004, we have built a reputation for excellence by providing high-quality new and used equipment to the construction industry across North America and beyond.

We specialize in a comprehensive range of solutions, including piling, anchor, tieback, and limited access machines. As an authorized TesCar dealer, we offer a robust fleet for both sales and rentals, supported by our extensive inventory of tooling and wear parts. Our commitment to innovation is reflected in our expanding lineup, which now includes solar rigs and telescopic crawler cranes to meet the evolving needs of the renewable energy and heavy lifting sectors.

At Caisson Consultant Inc., we pride ourselves on being more than just an equipment provider. Our dedicated team offers full-service technical support, on-site maintenance, and logistics management, ensuring our clients' projects remain efficient and on track from start to finish.

	We help \$5M–\$60M companies build revenue engines that actually run. No fluff. No recycled frameworks. Just sharp diagnostics, hands-on execution, and a team that treats your business like it's their own. We design sales structures that scale — from outsourced sales and team development to AI enablement and grant-funded transformation programs. Our Revenue Engine™ and DualForce Framework™ are the backbone of every engagement. Markham, Ontario. Serving manufacturers, construction, and professional services firms across Canada. www.changeconnect.ca	Agnes Lan agnes.lan@changeconnect.ca 647-501-1008
	Through the Better Buildings Partnership (BBP), the City delivers various programs that provide funding, expertise and support to help building owners improve energy efficiency and accelerate emissions reductions in their residential, commercial, industrial and institutional buildings across Toronto. Buildings are the largest source of greenhouse gas emissions in Toronto today, generated mainly from burning fossil fuels for heating, cooling and hot water. The City's target is to reduce emissions from all sectors to net zero by 2040. https://www.toronto.ca/services-payments/water-environment/net-zero-homes-buildings/better-buildings-partnership/	Duncan MacLellan Duncan.maclellan@toronto.ca 416-677-4540
	Corfix is a field-first app that connects safety, compliance, timekeeping, and scheduling to protect people and profit. Seamlessly connecting to your ERP, HR, or Payroll systems, Corfix makes it easy to collect data, report on your business, and make smarter decisions. https://www.corfix.com/	Kennedy Kay Kennedy.kay@corfix.com 416-677-4540

Petroglyph Projects was built by people who have spent more than 30 years delivering complex capital construction and linear infrastructure projects – not by software developers and salespeople. We understand how projects actually fail, where schedules break down, and why accountability erodes in the field.

In real world project delivery, software is a critical tool. The best in class software solutions we deploy, integrate, and configure exist for only one reason – to enable disciplined project management, bring clarity to execution, and make expert judgment visible, measurable, and repeatable across your organization and projects.

Xenex Enterprises Inc. is a private Canadian company established in 1983, specializing in Information Technology and Services.

Xenex Enterprises Inc. focuses on digital signing and sealing solutions, particularly within the surety and insurance industries. The flagship products include SignatureMaster™ and SuretyMasterBonds™, which leverage advanced technologies such as blockchain and artificial intelligence to streamline business processes and enhance security. The key focus areas of the company are as below

- Digital Signing and Sealing: The SignatureMaster™ solution allows users to digitally sign and seal documents, significantly reducing the reliance on physical paperwork and improving efficiency in transactions
- E-Bonding Services: The electronic bonding solutions that facilitate quicker processing times for surety bonds, enabling clients to manage their bonding needs online with ease.
