Fall Safety Reminder:
Stay Alert Around
Railway Tracks

As October brings shorter days, cooler temperatures and changing weather conditions, it's an important time to remind everyone to stay alert around railway tracks and crossings.

Reduced daylight, fog, rain and early frost can affect visibility and road conditions, making it even more important to approach railway crossings with caution. Whether you're driving, walking or operating farm equipment, always obey railway signs and signals, look and listen for approaching trains, and never attempt to cross when a train is approaching.

Railway tracks and rights-of-way are not safe places for walking, taking shortcuts or recreational activities. Trains can approach at any time, often faster and more quietly than expected, and cannot stop quickly.

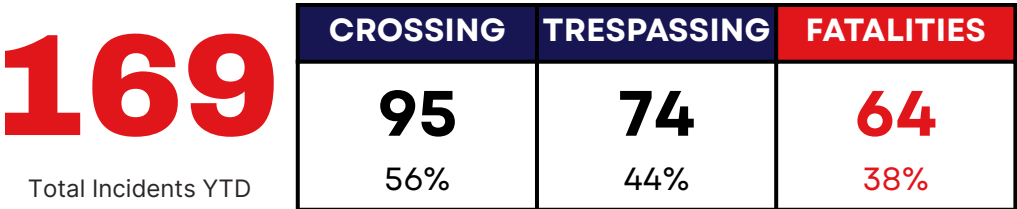

One decision can change many lives. A railway incident can have a lasting ripple effect on families, railway employees, first responders and entire communities.

As we move into the fall season, we encourage everyone to make railway safety part of their everyday routine

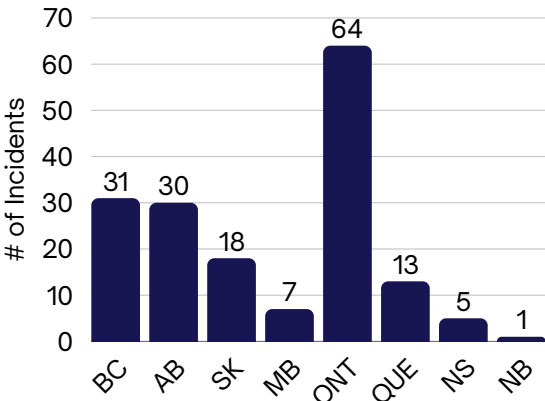

Rail safety is a shared responsibility, and every safe choice matters.

Data from Jan 1 - Sept 30, 2026

TOTAL INCIDENTS

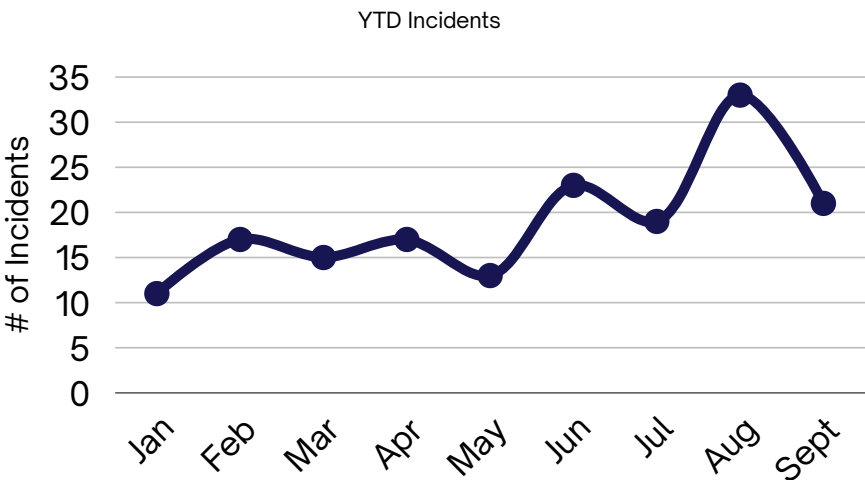

Incidents by Province

FACTS

- More than one-third of all recorded incidents involved at least one fatality.
- Trespassing has accounted for 44% of incidents, but 84% of all fatalities.
- Across all incident types, Tuesday has highest with 29 incidents, followed by Thursday with 28.
