

ZACH JAMES MEDIA

Year-end gravel measurements are a smart move for rural municipalities.

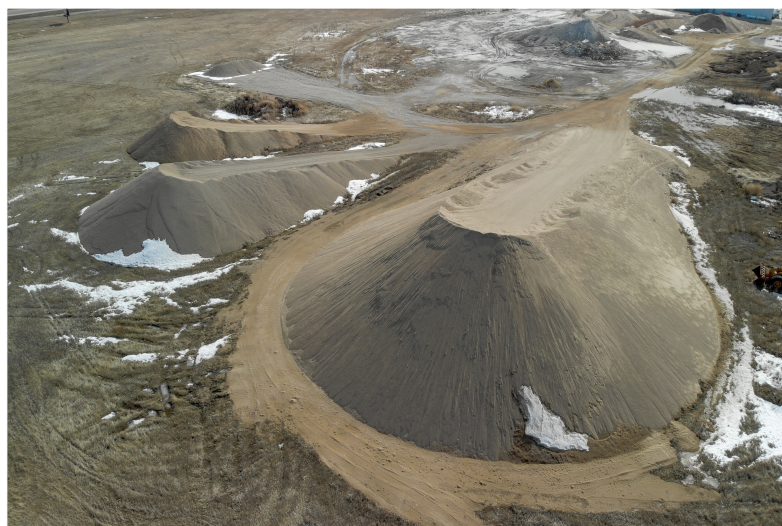

1. Get accurate year end gravel measurements

Accurate gravel measurements are crucial for ensuring that your inventory records and financial reporting accurately reflect the true value of your gravel.

2. Improve budgeting and planning for the year to come

Knowing exactly how much gravel is available allows your RM to plan future gravel purchases and crushing requirements more effectively.

As a **SARM-approved vendor**, Zach James Media is already set up to work with your RM. Our gravel measuring service is available through your existing SARM procurement channels—making the process simple, streamlined, and backed by an organization **you trust**.

Why Measure gravel?

For rural municipalities across Saskatchewan, gravel is a highly valuable and widely used resource. Accurately measuring your gravel in the fall is essential for precise year-end figures, providing a solid foundation for **planning the coming year**.
