Gravel Pit Measuring & Data Processing

Gravel Volume Measurements

What used to take days, can now be accomplished in minutes

Zach James Media offers professional drone services specializing in gravel pit measuring and data processing. We focus on building strong customer relationships by offering our data in an efficient, accurate, and safe manner.

EFFICIENCY

By best practice our gravel surveys takes no longer then 10-30 mins (pending on site size).

ACCURACY

Our method takes into account every detail of every pile, giving you volume measurements you can trust.

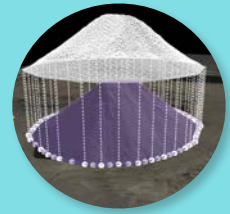

SAFETY

Drone surveyors can remain off site while collecting the data they need.

1. Drone Survey

Time: 10-30 minutes per site

2. Data Processing

Time: 2-3 hours

3. Annotation Report

Time: Typically delivered first thing the following morning.
