

Westside Solutions Inc.

[Westside Solutions Inc.](#) is a South Shore Clean Cities Platinum Level member.

Westside Solutions Inc. (WSI) manages sustainability focused projects for commercial, industrial and petroleum market customers. Energy efficiency upgrades that WSI offers include LED lighting, EC motors and anti-sweat controls for refrigeration and HVAC retrofits.

Westside Solutions Inc. has partnered with ChargePoint electric vehicle charging (also a South Shore Clean Cities Diamond Level member) to bring electric vehicle charging stations to its commercial customers. ChargePoint brings electric vehicle charging to more people and places than ever before with the world's largest open electric vehicle charging network. ChargePoint designs, builds and supports all of the technology that powers this network — from electric vehicle charging station hardware to energy management software, as well as a mobile app. Westside Solutions Inc.'s work transforms transportation and energy use by helping more people choose to drive electric.

ChargePoint's electric vehicle charging stations, mobile app and network make it easy to charge EVs anywhere. Westside Solutions Inc.'s energy management solutions help people and businesses shift away from fossil fuels. In turn, Westside Solutions Inc. also manages the growing demand for electric vehicle charging. Their work with multiple stakeholders — from automakers to individual businesses — paves the way for widespread electric vehicle adoption.

Every day, Westside Solutions Inc. adds more drivers and businesses to its network because driving an electric vehicle makes the most sense. That's what Westside Solutions Inc. is all about: driving a better way.
