Donald Engineering President Mark Gauthier Inducted into Michigan Tech's College of Computing Honor Academy

Grand Rapids, MI – October 2025 – Donald Engineering is proud to announce that company President Mark Gauthier has been inducted into the Michigan Technological University College of Computing Honor Academy.

The Honor Academy recognizes distinguished alumni and partners who have made outstanding contributions to computing, innovation, and education. Mark's induction celebrates his lifelong dedication to advancing mechatronics and automation, both through his leadership at Donald Engineering and his continued involvement with [Michigan Tech's Mechatronics Program](#) and Tech's [Mechatronics Playground Lab](#), which Donald Engineering sponsors.

A 1985 Michigan Tech Mechanical Engineering graduate, Mark has helped shape the future of industrial automation while mentoring students, supporting hands-on learning, and serving on the Mechatronics Industrial Advisory Board.

"Being recognized by Michigan Tech is a professional lifelong dream," said Gauthier. "But this honor is truly about the entire team at Donald Engineering. None of this would be possible without their dedication, collaboration, and innovation."

While the award celebrates Gauthier's individual achievements, it also reflects the collective strength and partnership-driven spirit that define Donald Engineering. Together, the team continues to advance the future of automation, fluid power, and motion control across industries and educational initiatives.

About Donald Engineering

Founded in 1965, Donald Engineering is a Michigan-based engineering partner and authorized distributor specializing in hydraulic, pneumatic, and electric components. With locations in Grand Rapids and Grand Haven, Donald Engineering provides partnership driven solutions for industrial automation, marine automation, medical automation, and mechatronic applications to help manufacturers increase safety, reliability, and productivity.
