

WEBINAR

# Reducing Risk on the Road

How to Keep Officers Safe During  
Roadway Operations

Friday, Dec. 13 | 1 pm ET / 10 am PT

**Register Now**

*to attend live or get the recording*

The routine nature of traffic stops and accident response obscure the truth—roadway operations are inherently dangerous for law enforcement officers. So far this year, 14 officers have died as a result of “struck by” incidents. And in a recent survey, more than 1 in 10 people said they have either struck or nearly struck a first responder stopped on or near the road.

Reducing the risk associated with law enforcement roadway operations starts with deepening our understanding of the problem and incorporating the latest technology and research. Join Lexipol’s Gordon Graham and a panel of experts to learn how your agency can take steps to make the roads safer for officers.

You’ll learn:

- The importance of changing behavior and procedures to address the risks involved with roadway operations
- Highlights from a recent survey on distracted driving
- How traffic crash reporting, safety analysis and records can inform safety efforts
- Research on the effectiveness of vehicle warning lights

Presented by:

Gordon Graham  
Co-Founder, Lexipol  
Attorney and Risk  
Management Expert

Maureen Vogel  
Director, Communications  
National Safety Council

Grady Carrick  
Principal  
Enforcement Engineering  
Chief (Ret.), Florida  
Highway Patrol

Jack Sullivan
