

MSJ/VJ + MYCOMPUTERCAREER

HOW MSJ/VJ AND MYCOMPUTERCAREER WORK TOGETHER

MyComputerCareer is honored to be the first college to formally partner with VetJobs and Military Spouse Jobs! VetJobs Chief of Staff, Harry "Chip" Trosclair Jr., and MyComputerCareer's Director of National Employer Engagement, Ashley Vandiver, met and saw tremendous value in partnering to best serve our Military/Veteran community, their families and supporters.

This unique collaboration was developed with one broad and important goal in mind, to provide career service and support to Military/Veterans and their spouses, dependents, and caregivers.

Since the inception of our partnership in July of 2025, VetJobs and Military Spouse Jobs have worked closely with MyComputerCareer. VetJobs' experts joined our school's "Get Into IT" live LinkedIn broadcast twice in the last six months to share tips and guidance on a number of topics including: resume optimization, utilizing LinkedIn in your job search, the importance of networking, and more.

VetJobs has also been actively involved in supporting MyComputerCareer's Virtual IT Career Fairs that bring employers and candidates together to find skilled IT talent, provide information sessions, and daily support our Military/Veterans, their spouses and caregivers.

➔ SO WHAT DOES OUR PARTNERSHIP ENTAIL?

- Extended resume support for both civilian and government positions
- Interview prep through mock interviews and advice on navigating the conversation
- Access to VetJobs' job boards with thousands of available openings
- Employers gain access to a broader pool of strong, skilled IT candidates ready to hit the ground running
- Ongoing support from both VetJobs and MyComputerCareer experts

CyberWarrior Program

Powered by MyComputerCareer

YOUR NEXT MISSION: LAUNCH A CYBERSECURITY CAREER IN JUST 12 WEEKS

MyComputerCareer's **Cyber Warrior Program** is a recent example of the school's dedication to the military community. The job-focused program is 12 weeks of intensive IT and cybersecurity training to help students earn the skills needed to secure up to four CompTIA certifications (A+, Network+, Security+, and CySA+). No prior IT experience is required to enroll, and it's GI Bill eligible, SkillBridge eligible, and DoD 8140 compliant. A 19-week evening option is also available for the growing program.

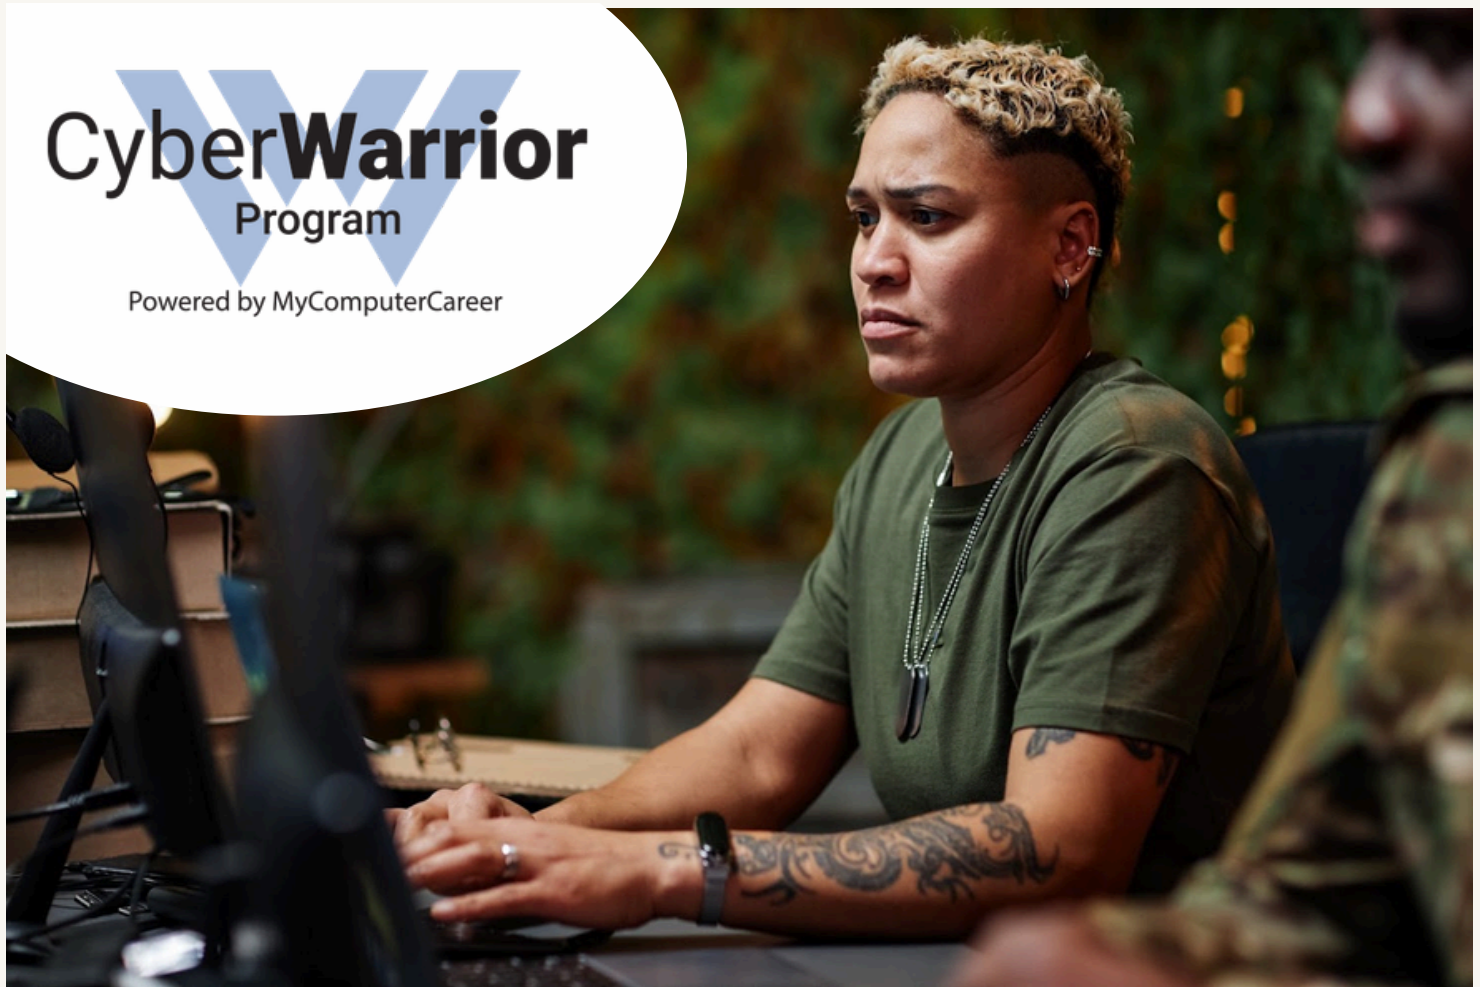

In addition to the **Cyber Warrior Program**, our college offers skills-training platforms from entry level, to advanced courses, to skills-training for working IT professionals. Those include:

- **Information Technology Security and Administration Program (ITSA)** – entry level skills
- **Cyber Security Specialist Program (CSS)** – advanced skills
- **Cyber Security Engineer Program (CSE)** – further advanced cyber security skills
- **Associate of Applied Science in Network Administration and Cyber Security** – most advanced program offered, prerequisites required
- **TechSkills** – Our upskilling and reskilling division for working IT pros and employer partners

CyberWarrior Program

Powered by MyComputerCareer

For MyComputerCareer, this collaboration is a welcome extension of our dedicated Career Services department to an even larger audience of Veterans, spouses, dependents and caregivers. Since opening our doors, MyComputerCareer has equipped thousands of graduates with the skills and resources needed for success, resulting in alumni working for some of the top tech companies across the country. The Career Services team is committed to supporting both current students and graduates throughout the lifetime of their careers.

This collaboration with a respected organization like VetJobs and Military Spouse Jobs is going to provide the resources and support to help our Veterans, their families, and caregivers. We look forward to continue working together to advance this mission into the future.
