

Final Semester of RCR Workshop Series, For Credit Course in the Works

Steps are underway to establish the Responsible Conduct of Research (RCR) series as a for-credit course for undergraduate and graduate students of any discipline. Researchers will incur tuition fees for this College of Education course. First-time attendees and participants in the Division's no cost four-part workshop series who want a deeper understanding of best practices for ethical research are encouraged to register for this course.

Researchers, especially those who have already attended the four-part workshop, are encouraged to take advantage of its final offering as a free series this Spring. It is highly recommended to all who are involved with research or have an interest in becoming a researcher. It is required for those working on NIH funded projects. Sessions are offered twice on varying dates and times. Select the option that best suits you. The free series will not be offered after the Spring.

To register for the final free RCR workshop series, click [here](#).

Responsible Conduct of Research Workshops

SPRING 2019

Jan. 17 or Feb. 15
Data Management Practices, Research Misconduct and Collaborative Research

Jan. 22 or Feb. 1
Conflict of Interest

Jan. 30 or Feb. 13
Protection of Human Subjects and Welfare of Research Animals

Feb. 6 or Feb. 26
Responsible Authorship & Publication, Peer Review and Mentoring Responsibilities

This series is for graduate students. All sessions are from 11 a.m. - 3 p.m. on the Boca Raton campus.
