

IBC REGISTRATION APPLICATION FORM

IBC Number (Assigned by RI Office):	
Date of Approval:	
Biosafety Level:	
IBC Chair Signature:	

Investigators utilizing biohazardous materials are required to register their work with the FAU IBC. Biohazardous materials include: Microorganisms (bacteria, viruses, parasites, fungi, prions and rickettsia) infectious to humans, animals or plants; Biologically active agents (toxins or venoms); Human and nonhuman primate materials (blood, tissue, etc.); Animal materials other than human and nonhuman primates; and Recombinant and synthetic nucleic acid. Not all work will require review by the full IBC.

Instructions: Complete Sections 1-7, and Sections 17-24. Complete all other sections as applicable to your research as outlined in Section 5.

- ▷ **Sections 1-4. Project Information**
- ▷ **Sections 5-7. Project Uses (check all that apply and complete the corresponding sections in the form**
- ▷ **Section 8. Human Research (Gene Therapy/Transfer):**
- ▷ **Section 9. Recombinant/Synthetic Nucleic Acids Use**
- ▷ **Section 10. Microorganisms**
- ▷ **Section 11. Biological Toxins/Venoms**
- ▷ **Section 12. Human or Nonhuman Primate Cells/Tissues/OPIM**
- ▷ **Section 13. Other laboratory animal materials (Cells/Tissues/Fluids for in vitro use)**
- ▷ **Section 14. In Vivo Animal Research**
- ▷ **Section 15. Field Work with Animals**
- ▷ **Section 16. Storage of Biological Materials (This section is for storage of materials that are not currently being used in laboratory research)**
- ▷ **Sections 17 – 24. Safety**
