Warmest Welcome

Kenneth Salleng, DVM, recently joined the Comparative Medicine team as the director veterinary care.

Salleng brings a wealth of experience in clinical veterinary medicine, with a large variety of species, laboratory animal pathology, and as a research administrator. His roles at FAU will include managing the veterinary medical, clinical diagnostic, surgical, treatment and pathology services within the university's animal care and use program. This will include animal health surveillance, quarantine and environmental monitoring programs.

Salleng earned his doctorate in veterinary medicine from the University of Missouri-Columbia. He is both a certified professional in institutional animal care and use committee (IACUC) administration (CPIA), and a diplomate of the American College of Laboratory Animal Medicine (DACLAM).

Previously, he was at Vanderbilt University in Tennessee, where he held several positions from 2006 to 2019 including associate director of the Division of Animal Care and director of the Office of Animal Welfare Assurance. He also served as the chief of the veterinary pathology section in the Department of Comparative Medicine at Wake Forest University in North Carolina, and as a staff veterinarian at private veterinary practices.
