

I-SENSE Welcomes New Team Member

Boca Raton, Fla. (April 19, 2018) – Jordon Beckler, Ph.D., an assistant professor at FAU Harbor Branch Oceanographic Institute, is jointly appointed as an I-SENSE faculty fellow. A Gulf Research Program Early Career Fellow with the National Academies of Science, Engineering and Medicine, Beckler is directing Harbor Branch's Geochemistry and Geochemical Sensing Lab. Previously, he served as a staff scientist and program manager of the Ocean Technology Research Program at Mote Marine Laboratory in Sarasota, and a courtesy faculty member at the University of South Florida Sarasota-Manatee.

"I'm surrounded by all of the tools I need for success: the electronics and software engineering expertise from I-SENSE, and the facilities and ocean engineering mentorship I am receiving from senior faculty at Harbor Branch," said Beckler. "I'm now empowered to tackle projects that are way beyond what I've thought I could previously manage. Plus, the I-SENSE leadership has been really instrumental in identifying appropriate, creative and exciting proposal opportunities to apply my expertise."
