# SAVE THE DATE

## Pavement & Materials Partnering Committee (PMPC)
## Virtual Overview Workshop

**PMPC Virtual Overview Workshop**
**August 21, 2026**
**10:30 a.m. – 12:30 p.m.**

**Want to be a difference maker? Want to contribute to the advancement of material specifications and construction?**

**This workshop will provide you an introduction to the PMPC:**

- **Familiarize personnel with the cooperative format.**
- **Review the type of work involved.**
- **Overview of processes for reviewing and proposing specifications, test methods, and policies for materials.**
- **A starting point for those wanting to follow and participate in the PMPC.**

The Pavement & Materials Partnering Committee (PMPC) was established in 2018 as a collaborative effort by Caltrans with material producers and the construction industry to review and propose improvements to Caltrans roadway construction specifications, and test methods for aggregate, asphalt, and concrete materials.

The goal of the PMPC is to operate efficiently and deliver work products in a timely manner. These work products typically involve improvements to construction contract standards, encompassing construction methods, specifications, and testing methods.
