

LESSONS LEARNED ON BURN AND BLAST WOUND CARE FROM UKRAINIAN FRONT LINES

Carroll International, a U.S. federal contractor and the exclusive distributor of Regenlyst Hydrogel Bandages — developed and manufactured at Lviv Polytechnic National University — invites you to an engaging informational session. During this session, we'll share clinical insights, real-world experiences, and lessons learned from the use of Regenlyst Hydrogel Bandages within the Russian invasion of Ukraine.

This lesson will be held virtually and recorded via Google Meet
Register Today: <https://forms.gle/Z7Lr7yJGHU4woZQu5>

WEDNESDAY
25 FEBRUARY 2026

TIME
AT 10.00 AM – 11.00 AM EST

GUEST SPEAKER:
DR. MYKOLA I. KUSHNIRCHUK

Dr. Kushnirchuk is a PhD in Medical Sciences at the Department of General Surgery (Danylo Halytsky Lviv National Medical University) and a Vice-Academician of the Academy of Technological Sciences. Dr. Kushnirchuk is the author of scientific publications on skin and soft tissue pathologies. He also has practical experience with hydrogel dressings including its usage within the current Russian invasion of Ukraine.

Key Points of Presentation:

- Power Outages During Surgery, SupplyChain Improvisation
- Infection, Necrosis, and Survival: The Hidden War of Soft Tissue
- Burn Management During Infrastructure Instability
- Civilian Hospitals Adapting to Military-Grade Injuries
- Modified Triage Algorithms Under Missile Strikes
- Use of Regenlyst Hydrogel Bandage during the Russian invasion of Ukraine
