

Make an Earth Day Journal

ELLI-vations presented by *ELLI, The Early Language and Literacy Initiative*SM

At Stepping Stones, we believe that everyone is a reader and writer, even our youngest friends! Ask your child to make an Earth Day journal and document the special actions she/he takes to help protect the environment each day.

Here are a few tips:

- Recycle, reuse and reduce waste.
- Plant a tree.
- Turn off the lights.
- Limit water use.
- Volunteer.
- Spread the message.

Label each day and describe or draw the helpful action that was taken.

YOU WILL NEED

- Homemade recycled seed paper or scrap paper
- Washable tempera or watercolor paint
- Markers or crayons
- Other creativity tools and supplies you have at home.

Have fun!

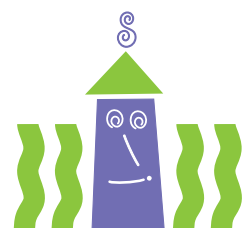

My Earth Day Journal	
Today I made the following Eco-friendly choices:	
Recycled my water bottle at lunch	
Only used one paper towel after washing my hands	
Turned the lights out in my bedroom when I wasn't using it
