

DIY Bubble Snake

YOU WILL NEED

- Shallow bowl
- DIY Bubble Solution
[Check out our "DIY Bubble Solution" PDF for the recipe!](#)
- Recycled and clean plastic bottle
- Sock or a piece of fabric
- Duct tape or rubber/elastic bands
- Permanent markers (optional)
- Food Color or liquid water colors (optional)

STEPS

1. Place your bubble solution into a shallow bowl.
3. Slide the sock or fabric over the cut end of the bottle and secure it using duct tape or a rubber/elastic band.
4. Dip the fabric end of the bottle into the bubble mixture.
5. Blow through the top of the bottle to make long trails of bubbles.

MORE EXPLORATIONS

- To create colorful bubble snakes, mix food coloring or liquid watercolors into the bubble mixture, or you can place a few drops of different colors directly onto the fabric.
- Encourage children to experiment by creating different lengths and colors of bubble snakes.
