

Popsicle Puzzles

YOU WILL NEED

Wide popsicle sticks, cardboard or paper
Paint or markers
Masking tape

STEPS

1. First, gather your popsicle sticks. If you want to make a small puzzle use about 6 sticks, if you want to make a larger and trickier puzzle use about 10 sticks.
2. Line up your popsicle so they are touching each other and are the same height. Use a ruler to make sure they are lined up straight.
3. Once your popsicle sticks are even on top and close together, put a piece of your masking tape across the middle of all of your sticks to hold them together. It works best if you use three pieces, so add one on top and one on the bottom, too.
4. Now flip your popsicle sticks over and you are ready to make your picture! You can design your puzzle anyway you choose, be creative!
5. When you are done making your picture and the paint is all dry, take the tape off the back of puzzle to release the pieces.
6. These puzzles are easy and fun to make! Your puzzle picture can be anything you want it to be.
