

DIY Bubble Wands

YOU WILL NEED

- Plastic cups
- Plastic soft drink bottles
- Pipe cleaners
- Drinking straws
- Funnels
- Scissors
- DIY Bubble Solution
[Check out our "DIY Bubble Solution" PDF for the recipe!](#)
- String

PLASTIC CUP BUBBLE WAND

1. Have an adult help you punch a hole in the bottom of the cup that is large enough for a straw to fit.
2. Place your straw into the hole.
3. Dip the open end of the cup into the solution.
4. Blow through the straw and create bubbles.

PLASTIC SOFT DRINK BOTTLE WAND

1. Cut the bottom off the bottle.
2. Dip the cut end of the bottle into the bubble solution.
3. Use the mouth opening of the bottle to blow your bubbles.
How does this compare to the plastic cup bubbles?

PIPE CLEANER WANDS

1. Create any shape(s) you like from a pipe cleaner
2. Make sure you keep a small section of the pipe cleaner to use as a handle.
3. Try different shapes! How does the bubble change when you use different shapes?

PLASTIC FUNNEL WAND

1. Simply dip the large end into the solution and blow through the small end! How big a bubble can you make with this tool?

DRINKING STRAWS WAND

1. Bunch straws together in your hands.
2. Dip one end of the bunch into the solution and try to blow as many bubbles as you can! How many can you make? Are they big or small?

GIANT BUBBLE WAND

1. Try tying a string through two straws and use the straws as handles to dip the string into the solution.
