# SunLine Student Art Contest

**Theme: “SunLine Buses are Important for the Coachella Valley & the Environment”**

As a leader in alternative fuel solutions, SunLine’s buses are all environmentally friendly. Our 5th Annual Art Contest is a way for our local youth to learn more about the advantages of clean energy and the public transit system.

This contest is more important now than ever because it gives students a way to relieve anxiety and work towards a goal while continuing their schoolwork at home during COVID-19. The contest is open to students in grades, k-5th, grades 6-8th and grades 9-12th. One winner is chosen per category, for a total of three winners.

For the first time, high school students, grades 9 through 12, are also encouraged to submit artwork for the contest. Three first-place winners will be selected from each grade category. The artwork of the first-place winners will be displayed on SunLine’s state-of-the-art hydrogen electric fuel cell buses. The artwork of second- and third-place winners will be displayed at local bus shelters.

Full contest rules, instructions for submitting artwork, and inspiration for art can be found at [www.SunLine.org/studentart](http://www.SunLine.org/studentart). Artwork must be turned in no later than 5 p.m. on Wednesday, June 3, 2020. Be sure to follow SunLine Transit Agency on social media, @SunLineTransit, for artwork inspiration!
