

Tejas Dessai

Director of Thematic Research, Global X ETFs

✉ tdessai@globalxetfs.com

Tejas Dessai leads Global X's Thematic Research efforts as Director of Research. Tejas joined Global X in 2022 as a Research Analyst, covering technology themes and products, with a focus on disruptive technologies including artificial intelligence, robotics, cybersecurity, social media, gaming, and digital advertising.

His research has been extensively covered in the tech and financial press, including the Wall Street Journal, Bloomberg, The Washington Post, Business Insider, and Reuters. He routinely publishes his insights on the Global X website, covering disruption and structural trends transforming the global economy, with focus on themes such as defense technology, artificial intelligence, and data centers.

Prior to joining Global X, Tejas worked as an Associate for SSR LLC, an independent research provider, covering mega and large cap TMT equities, specifically focusing on disruptive technology and emerging trends.

Tejas holds a BTech in Electronics and Communications Engineering from the National Institute of Technology Goa and earned his MEng in Industrial Engineering from North Carolina State University at Raleigh.
