

FUND A NEED

2019 LIVE AUCTION PORTION OF

OUR GOAL: \$30,000

In 2017, you were a part of history by helping us bring thirty-six (36) iMac desktop computers into our Technology Center through our very first “Fund a Need” project! In 2018, you once again helped us bring Flat Screen Projectors to a portion of our elementary and middle school classrooms. **This year we need you once again to help us finish the Technology needs of the School.** This would provide additional Flat Screen Projectors and iPads for classes. You can directly impact students by meeting this important classroom need that is a direct request from our Holy Name Teachers. **We can accomplish this goal with your help and support on March 23rd, 2019, during the Live Auction segment of our auction.**

BENEFITS INCLUDE:

- Technology will be improved in all classrooms –we were able to purchase several projectors last year with funds raised, but we were unable to buy projectors for all classes. This means not all students have equal access to projected material. A flat screen projector provides students a clear, unobstructed view of the lesson and allows teachers to present information interactively.
- All classrooms will have the same technology so that teachers can transition seamlessly between classes and incorporate greater technology and visual aids.
- Elementary teachers use iPads to augment classroom learning. iPads can help children repeat skills and allow them to practice lessons independently. iPads can provide more personalized attention to struggling students and can track a student’s progress.
- We are riding the wave of the future! We are taking the lead as high schools and colleges are transferring to using flat screen projectors, iPads, and other technology in the classroom. This is technology our students will see in higher education.

DOUBLE YOUR CONTRIBUTION . . .

CHECK WITH YOUR **EMPLOYER** TO SEE IF **CORPORATE MATCHING** IS AVAILABLE.

REMEMBER, YOUR DONATION IS 100% TAX DEDUCTIBLE!

I AM UNABLE TO ATTEND THE AUCTION, BUT I WOULD LIKE TO
SUPPORT THIS CAUSE BY DONATING!

STUDENT NAME: _____ GRADE / HOMEROOM: _____

YES, PLEASE CHARGE MY FACTS ACCOUNT

I'LL PAY BY CHECK (PAYABLE TO: *HOLY NAME SCHOOL*)

AMOUNT: \$2000 _____ \$1200 _____ \$800 _____ \$400 _____ \$100 _____ OTHER \$ _____

THE COST OF ONE (1) FLAT SCREEN PANEL AND INSTALLATION IS ABOUT **\$5,500**

THE COST OF ONE (1) IPAD AND COVER IS **\$400**

To better understand the current technology that is offered to our students and what is needed specifically in each class, please see the reverse page.

By completing our Technology Needs for the School, we will be able to enrich the offerings that our students receive while increasing consistency of curriculum and instructional minutes. Our need, which was determined by our Holy Name teachers, is to have more iPads in the classroom and to continue to install SmartBoards and Flat Screen Projectors in all classrooms. Currently our students have access to the following technology in their classrooms:

Current iPads	Current Projectors
<ul style="list-style-type: none"> • Our K-3 classrooms have 15 iPads each. • Our 4th grade classroom has a classroom set of extremely outdated iPads that restrict technology usage in the classroom. This iPad set needs to be fully replaced. • Our 5th Grade has a complete classroom set of brand new iPads that were bought this year. • 6th-8th grade students have their own iPads as part of our 1:1 iPad Program that was developed to model the technology expectations they will have in high school. 	<ul style="list-style-type: none"> • K, 1st, and 2nd Grade have had new SmartBoards installed over the past two years. • 3rd, 4th, and 7B need new projectors as their current ones are outdated and limited. • 6A, 6B, 8A, and 8B received new FlatScreen Projectors this year. • 5th and 7A have SmartBoards with limited functions that need to be replaced in the next two years

Our Need:

- At least 18 iPads in each K-2 classroom and full classroom sets for our 3rd-4th classrooms.
- At least 3 new projectors for our classrooms.

Benefits Include:

- Our new Flat Panel Projectors have been a wonderful asset to the classrooms. These smart screens allow our teacher to store their notes in various folders so students who are absent or come for additional support are able to quickly scan a code to access the teacher's notes. These screens also allow for greater collaboration and hands on interaction between students and the curriculum.
- Enrichment teachers such as our Mandarin and Spanish teachers are constantly switching classrooms. By having the same technology in each classroom, teachers can transition seamlessly between classes and incorporate greater technology and visual aids. This will in turn keep students engaged and on track in their curriculum.
- With iPad sets that can address the needs of at least half the class, teachers will be better able to implement classroom level curriculum.
- Teachers are able to better differentiate and implement rotational learning in a consistent manner in the primary classrooms.
- K-5 teachers use iPads to implement usage of STMath, Lexia, and ALEKS, math and language adaptive programs that allow students to further develop their foundational skills by going at their individual paces through classroom curriculum. Individualized programs such as these allow more personalized attention to students of all levels. Teachers are provided with immediate feedback so that they can continue to work with students to further develop their skills.
- SmartBoards and Flat Screen Projectors provide greater visual aids with less cords and furniture which allows students to have an unobstructed view of the classroom and more space to sit.
