February 11, 2020

This is a notification to Parents and Guardians to share information from the California Water Board. Safe and healthy school environments can foster healthy and successful children. To protect public health, the CA Water Board conducted a Lead Sampling at local schools in the area. The tests were conducted at every outlet that is used, or could potentially be used, for drinking or cooking.

If lead is found at any water outlet at levels above 15 parts per billion (ppb), which is equal to 15 micrograms per liter, the CA Water Board requires that the school take action to reduce the exposure to lead.

Initial test and retest results of Holy Name School showed that there were two areas where lead levels were above the action level (15 ppb) and have been removed from service. Those two areas are: the counseling room and the janitor closet next to the 8B classroom. These areas were never places where students could retrieve water. Nevertheless, the water flow to those two outlets has been shut off.

All other water outlets at Holy Name School are safe and below actionable levels. Continued monitoring of school water outlets will occur regularly.

For more information regarding water quality tests, please visit the CA Water Board at  
<https://www.waterboards.ca.gov/>.

Thank you.

Michael Miller
