

JA Interactive Resources Pt. 3

ELEMENTARY GRADES: K-5

The focus of these four K-5 lessons will help students learn about **FINANCIAL LITERACY** while playing games and solving problems. The JA curriculums will also initiate ideas on money management, practice math skills, while watching educational videos to support learning.

These activity-based lessons will help students practice their skills to think more critically *and* creatively. Each lesson/activity can be modified in any way to meet the needs of the student(s) you are supporting. To access JA Interactive Resources for Elementary Grades, please click on the following links below:

Click the session links below to access each Elementary Grade Lesson/Activity.

- [Session 1 – My Family Flag](#)
 - *Make a family flag to show what is special about your family.*

 - *Compare different ways people pay for things they want and need.*
 - *Grades 3-5*

JA Interactive Resources Pt. 3

ELEMENTARY GRADES: K-5

Click below to access our JA K-5 Grade Level Full Programs that have been converted to recorded videos for young students working on a fun brain break!

Each program is divided into five (5) lessons for that particular grade level with a volunteer leading the presentation and activities. Students can participate individually as time allows or whenever they are ready for a brain break aimed to help them become financially literate, work ready and hone their entrepreneurial spirit. Just click, play and learn!
