Mason Fuller

Born at 27 weeks

1 lb. 11 oz.

12.6 inches long

My son Mason was born very premature at 27 weeks gestation. He was in the NICU for 75 days before coming home and still only weighed a little over 5 pounds. Mason came to Partners In Learning (PIL) at Novant when he was a few months old. He received physical therapy and play therapy to help him progress to reach some very important milestones. Due to his prematurity, he was delayed in many areas, including crawling and walking. Partners In Learning staff and the early interventions that Mason received were, and are such a blessing. With every obstacle Mason faced, PIL was there to support and encourage him, and to celebrate each milestone reached with him. PIL was a second family, where I knew that my son was cared for and loved. Mason started kindergarten this year and though we are not at PIL every day anymore, PIL will always be a wonderful blessing to our family. We love PIL and I am grateful for their part in our family's journey.
