

High Adventure Treks Social Distancing Protocols

High Adventure Treks Social Distancing Protocols during coronavirus pandemic are listed below. These protocols are intended to make the HATS adventure environment as safe as possible for every attendee. The risk of coronavirus infection cannot be completely eliminated but can be significantly reduced if these protocols are carefully followed. If you are uncomfortable with any of these protocols, or are not willing to carefully follow them, then please choose not to participate in a HATS adventure until the pandemic danger period has passed. High Adventure Treks reserves the right to ask any attendees to leave the adventure if they are not willing to carefully follow these protocols.

- Do not attend a HATS adventure if you or your student(s) are not feeling well, or if you, your student, or a family member have been ill within the last two weeks. Pay particular attention to symptoms which include cough, headache, fever, body chills, shortness of breath. HATS will refund your fee if you are not able to attend for this reason.
- Temperatures of attendees may be taken upon arrival and at several times during the adventure. Temperature below 99.7°F, non-touch to forehead, is doc recommended limit.
- Maintain 6 ft distance from people that are not in your family. Keep situational awareness of people that are around you and work to maintain 6 ft social distance spacing.
- Bring plenty of soap and water with you and wash hands at least every two hours.
- Wearing a face mask is highly recommended when in camp or during games/activities. A face mask protects your nose and mouth from droplets, splashes and sprays that may contain germs. A face mask may also help to contain droplets if you cough or sneeze.
- If for some reason you are closer than 6 ft to someone outside your family it is required that you wear a face mask. This should only be for emergency reasons such as performing first aid.
- It is also highly recommended to wait for at least a minute to use a porto potty after someone else has used it, and to wear a face mask in the porto potties.
- Bring paper towels and a supply of zip lock sandwich or snack bags with you on the adventure. Take paper towel and zip lock sandwich or snack bag with you to porto potty. Spray inside/outside door handle with provided sanitizing solution and wipe down. Spray seat and wipe down. Dispose of paper towels in zip lock and then put zip lock in your own trash when you get back to your camp. Note that HATS will also sanitize porta potties several times per day.
- No hand-shakes or elbow bumps except with your own family. Head nods are acceptable.
- Cough or sneeze into your elbow, even if you are wearing a mask. This will help to contain any mist or droplets from the cough or sneeze.

HATS develops great leaders that model the way. Even if you are not concerned about coronavirus, there will be other teams around you that are concerned. Please be respectful of all our HATS members. Carefully applying these social distancing protocols will significantly reduce the risk of being infected with coronavirus if one or more attendees are infected. Please sign below to acknowledge: you have read and understand these protocols; you have explained them to your student; you and your student are willing to carefully follow these protocols.
