

- **Portable Power and Site Safety System**
- **The Power of Emergency Management**

The Power Tower-Portable Power Distribution System, the first product of its kind to provide a fully integrated Emergency Activation System (EAS).

When activated the EAS alarm will sound at 120 decibels. Each Power Tower Distribution Center will provide back up power for up to one hour all while the Emergency Power Failure LED Beacon illuminates your exit path. And that's only the beginning...

### CONSTRUCTION

Tie Down Safety's Portable Power Distribution Systems are made from Heavy Duty Aluminum and are built to last. Lightweight and easy grip Dolly Style handle makes the Power easy to relocate or transport to another job site.

All of our safety products are coated with our proprietary High Visibility TS22 Safety Paint to endure UV degradation.

### APPLICATIONS

Applications including but not limited to construction sites, plant maintenance, plant turnarounds, hazardous location operations, shows, exhibits, shipyards, warehouses and much more.

### POWER

125 Volt Circuit Power. Power Tower Portable Power Distribution Center is engineered with the latest in GFCI technology that provides users with the highest level of electrical power. Equipped with neutral and reverse phasing protection. Each duplex outlet provides 15A/125V currents and one GFCI-protected circuit. Charge smart phones, tablets, laptops and tools. Power Tower- Portable Distribution System. The Power of Emergency Management.
