# Changemaker Camps

**\*\*Short-term, intensive bursts of focused learning and reflection on a target challenge area.\*\***

**\*\*Combine collective passion and wisdom to redesign your own mindsets, relationships, curriculum, and/or systems.\*\***

## *Dear Educators and Community Leaders:*

Changemaking is an approach to teaching, learning, and making a difference that involves not necessarily doing more, but doing differently.

It means owning your role in bringing positive change to your community. It means caring for your well-being so you can care for others. And it means working together to solve our most daunting challenges.

Most importantly, it takes a Changemaker to raise a Changemaker and we are all important models for young people.

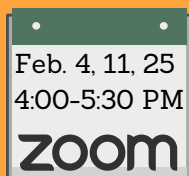

Will you join us this Spring for a valuable, practical, and supportive VIRTUAL learning experience leveraging the four skills of Changemaking to change your world?

*Brought to you by MNCC& United Way Youth Venture*

These programs available to participating school partners only.
