

Margalit Lai was born and raised in Israel, lived in Taiwan for four years, and has been in the U.S. for nearly 40. She believes that living in different cultures has helped her become an open-minded person who is continuously learning.

Margalit's nursing career has included caring for wounded soldiers in The Six Day War, teaching, working with children and ICU patients, being a visiting nurse, and starting and running an innovative and successful program for COPD patients.

Margalit joined LLAIC in 2016 and has enjoyed the activities and the very welcoming atmosphere. She has come to know our members closely through assignments on the membership and Let's Go committees.
