

# Support Team Startup Webinar

## All are Invited to a Support Team Startup Webinar

**Thursday, Sept. 17, 2:00-4:00 p.m.**

- Are you looking to start Support Teams inside of your organization?
- Do you have teams that would benefit from the Support Team model?
- Are you a part of a working Support Team?

Sounds like you are ready for the next step in building your Support Teams!

### **What is a Support Team?**

Support Teams are groups of volunteers who come together to provide practical, emotional, and sometimes spiritual support to people in need of extra care. This is a great model for providing care in this time when we are physically apart.

Support Teams are simple, flexible and guilt-free. Each team member does what they can, when they can, with a support system behind them. This workshop will prepare you to lead a team orientation in your own congregation or organization.

When you complete this training, you will be prepared to train your individual teams to start their work together.

### **During this two-hour online workshop you will:**

- Discover what makes teams work and successful.
- Create a Team Covenant.
- Participate in simulations on ways to offer practical, emotional and spiritual support.
- Explore scenarios on boundaries and limits.
- Look at a model for effective team meetings.
- Develop your team's next steps.

**We invite you to take the next step with us.
