**Episode overview:** The COVID-19 pandemic has had a profound impact on many communities, including Black, Latinx, and other communities of color, and trans communities. These communities are also vulnerable to HIV and other chronic health conditions due to structural and systemic racism. In this session, we will discuss the impact of the COVID-19 pandemic on Black and Latinx LGBTQ communities, what lessons learned from the HIV response have informed the COVID-19 response, and how we can support each other during this time.
