

KATHLEEN REEDER

WILDLIFE PHOTOGRAPHY

Alaska's Golden Triangle Wildlife Photo Safari

May 28 – June 4, 2021

June 5 - 12, 2021

Join professional wildlife photographer Kathleen Reeder for an incredible 8 day photo safari centered in what's coined as the "The Golden Triangle" for Alaska wildlife photography – the coastlines of Afognak Island, Katmai National Park and Lake Clark National Park. We'll scout and photograph coastal brown bears, eagles, puffins, sea otters, sea lions, whales and more. And sport fish for halibut along the way!

In Lake Clark National Park and Katmai National Park, you will safely photograph and experience wild coastal brown bears in their natural habitat on land and at eye level. In May and June, brown bears gather in large numbers in the bays and along the coast feeding on sedge grasses and digging for clams.

Afognak Island is within the world-famous Kodiak islands and is unique in that the combinations of land and sea mammals you will see are rarely found together elsewhere. You will photograph the popular Kodiak brown bears combing the pristine shoreline feeding on sedge grasses and digging for clams. You will also photograph tufted and horned puffins, bald eagles, orca (killer whales) and humpback whales, sea lions and adorable sea otters. Afognak is an incredible almost-mosquito less island with a wildlife experience in a completely remote atmosphere where you can play hard, eat big and sleep deep!

As we travel around the Gulf of Alaska, the landscape photography at all locations is impressive as well. You will bring home a vast array of photographs and videos!

Highlights

The safari begins and ends in Homer, Alaska. We'll travel by air and boat to find and photograph the best of Alaska's wildlife – coastal brown bears, fox, Sitka blacktail deer on land; eagles, puffins, oyster catchers, kingfishers in the air; whales, sea otters, sea lions, seals and dolphins in the water. Rest and renew each evening in first-rate lodging accommodations.

- Travel in a small group (maximum of 6 participants/minimum of 3)
- Lodging accommodations in Homer and on Afognak Island
- Expert bear viewing guides and fishermen
- 8 days of bear and marine wildlife photography

- Opportunity to sport fish for halibut, lingcod and rock fish
- Expert photographic instruction prior to and throughout the safari
