Subject: New Managing Editor

Hi everyone

I'm very happy to announce that Erica Jorgensen will be joining us as Managing Editor.

Erica is currently the Executive Producer of Special Projects and Streaming at NBC Boston, where her focus includes investigative reporting, debates and documentaries, and multi-platform content creation. More recently, she has taken on increased responsibilities in day-to-day newsgathering. Before that, she ran the investigative and consumer units at NBC Connecticut and was an investigative producer at WNBC in New York.

It's a return to CMG for Erica as well. She got her start as an investigative producer at our sister station, WSB in Atlanta.

Her experience in digging for fresh angles, coordinating special event coverage, and knowledge of the market will help take our newsgathering to the next level as we continue to grow.

Erica's first day will be April 28th. Please join me in welcoming her aboard!

Thanks

Scott
