## **UNMATCHED WATERING PRECISION.**

*IRRIGATION RUNTIMES  
TO THE SECOND.*

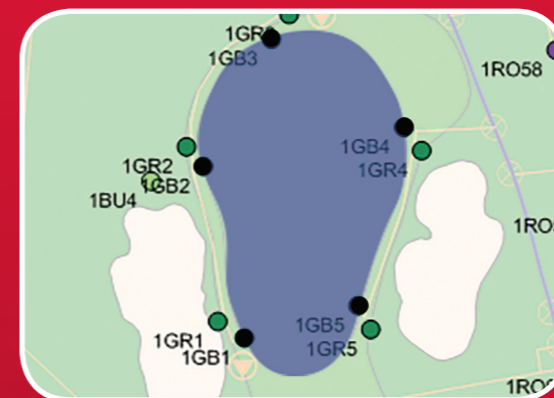

### **TRADITIONAL APPROACH – Water by Time**

- ▶ Each sprinkler running for the same amount of time
- ▶ Different amounts of water applied due to different arc adjustments
- ▶ Inconsistent application with some areas too wet and some areas too dry

## **The most comprehensive system testing and diagnostics.**

*IDENTIFY POTENTIAL ISSUES  
BEFORE THEY BECOME PROBLEMS.*

### **LATEST TECHNOLOGY – Water by Amount**

- ▶ Each sprinkler runs for the exact amount of time **TO THE SECOND** to apply the exact amount of water needed
- ▶ Consistent application of water to all parts of the green
- ▶ This level of precision **EXCLUSIVE** to Toro

### **Toro Lynx® Central Control**
