

Lynx® Dash Features

Toro Lynx® Dash is a collection of widgets designed to layer on top of other data services to provide a quick summary that will save you time and money!

Widgets are designed to be moved and resized to allow you to customize the layout and place the most important information in the optimum location. Get at a glance access to:

- **Lynx Status**
Understand how your irrigation system is running.
- **Current and 5 Day Forecasted ET**
See evapotranspiration figures in real time and forecasted 5 days in advance so you can build it into your watering plan and stay ahead of the environment.
- **Frost Warning**
Critical decision making data giving you precise information to maximize rounds played and protect your turf.
- **TurfGuard Sensor Data**
Use collected data from TurfGuard sensors to help you make quick watering decisions and stay ahead of course conditions.
- **Pump Station**
Get real time flow, pressure, status of your pump station.

Dynamic design optimized for all your devices.

Lynx Dash

\$99
per year

** Lynx Dash is available to current and expired NSN customers as well as anyone using Toro TurfGuard. Subscription is also included with all new Lynx central bundles for the duration of the included NSN subscription and with Lynx upgrades for one year.
