

Coming To Otterbine in 2020 by Angela Hopko

2020 will bring new and updated products to Otterbine!! Here is a preview of what you can expect to see in the first quarter of next year!

Mini-RGBW Light Systems:

These 2-light color changing light systems will be available for our 1/2HP Fractional system and allow the user to control lighting via a remote control. Optional Wi-Fi controls will also be available.

Improved Motors:

All 1/2HP-5HP motors will include a 316st/st shaft making Otterbine the only manufacturer in the industry with complete 316 st/st unit as standard equipment!

Additionally, an Oil Inducer Impeller has been added to 1HP-5HP motors to offer improved cooling and lubrication of the motor seal.

Improved Panel Design:

Our 1HP-5HP PCC's have been redesigned for 2020! What does this mean? Otterbine panels will be NEC & UL508A compliant, and we will be the only manufacturer to have this rating in all 60 Hertz HP & voltages, including GFI people protection becoming standard on 460V systems.

Also, the redesigned PCC's will offer simplified wiring and larger terminal blocks providing more workable space inside the panel.

Extended Warranties in 2019:

In 2019 we saw warranties extended on a variety of our product lines including Fractional Series & Light Systems to 3 Years, our Air Flo system warranty increased to 3 Years on the compressor, 5 years on the manifolds and 15 years on tubing; while our Giant Fountain warranty increased to 4 years, 5 years if purchased with the Sub-monitor option.

In 2020 we are upping the ante again by increasing the warranty on 1HP-5HP Power Units to a 2-year warranty.

Here's a sneak preview at one of the Mini RGBW packages we're rolling out for 2020!

And that's not all folks – more to come in 2020, stay tuned!
