*Not valid with other offers. No cash value.*

*At participating locations only*

Dirty or excessively clogged cabin air filters can produce a dusty, musty stench, especially when the HVAC system is turned on. Changing your cabin air filter at regular intervals will ensure that your passengers don't have to put down their windows in the dead of winter to get some fresh air. Stop by your local Performance Plus Quick Oil Change to get your cabin filter checked. Visit our website to find a **Performance Plus Quick Oil Change** near you!
